Scrum Retrospective

Points possible: 50

Category	Criteria	% of Grade
Areas for Improvement	Student identified true areas for improvement as well as plans to make improvements a reality.	25
Areas of Accomplishment	Student accurately identifies areas that he/she succeeded in and outlines plans to continue the success.	25
Organization	Thoughts are concise and clear.	25
Critical Thinking	Student shows deep thought in the expressed ideas.	25

Instructions: In the below areas, identify struggles you ran into as a team or as individuals and list them under Areas for Improvement. Tell how you plan to improve in these areas. Write a list of accomplishments under Areas of Accomplishment. Push this document to your GitHub repository for this week. Add the URL for this week's repository to this document where instructed and submit this document to your instructor when complete.

Areas for Improvement:

I need to work more on my project, and start testing everything to make sure my code and my API is working properly. And then once that is complete add my 5th entity to tie everything together for it to make sense to me.

Areas of Accomplishment:

I finished everything but my AnswerService, I will be wrapping that up today and start testing everything and figuring out where all my bug issues are at, and identifying my strong and weak points.

What is your favorite thing you learned this week?

I really enjoyed working on my project, and building something that I look at every single day. It has been a privilege doing a project like this, and identifying my strong and weak points when it comes to coding. Once i identify my weak points, work on them everyday to make them stronger and stronger.
